

Sapienza - Università di Roma  
Data Mining - Fall 2016  
Apache Storm - Homework

December 14, 2016

## 1 Assignment

Implement a WordCount program using Trident API.

The test your program we provide an input file.

For example, try as input the following sentences:

"Apache Storm guys are really great and they deserve an excellent mark"

"Having a great time programming with Apache Storm!"

"Data Mining class is the best we have ever attended"

"Good luck in solving this homework during Christmas holidays!"

This will be the output:

Apache 2
Storm 2
Christmas 1
...

Create a project in Eclipse using the instructions you find on the desktop of the virtual machine.
